

KACPER BARYŁOWICZ, B.ENG

AI AUTOMATION DEVELOPER

DESCRIPTION

Computer Science Engineer (B.Eng.) and AI Automation Developer specializing in building custom autonomous agents and streamlining business processes. Graduate of the Silesian University of Technology with a strong technical background in Python and LLM integration. Experienced in translating complex client requirements into efficient automation solutions. Committed to continuous learning, currently pursuing a Master's degree in Computer Science.

EXPERIENCE

- **03.02.2025 - 12.12.2025:**

Junior AI & Automation Support at autoMEE

Supported AI and automation projects for clients by proposing tailored solutions, managing projects, and assisting in automating daily business tasks using AI agents and related technologies. Worked with tools such as n8n, Zapier, and Voiceflow to build chatbots, integrate multiple APIs (GoHighLevel, Presta, Saldeo, etc.), and design backend solutions including custom APIs. Set up and maintained Linux servers, SSH/VNC configurations, VPNs, and used Google Cloud services. Collaborated with clients from Poland, the UK, and Ukraine, providing technical expertise, project management, and customer support.

- **10.01.2025 - 21.07.2025:**

Programming Trainer for children and teenagers at Giganci Programowania

Conducted Python programming classes for teenagers and introduced children to computer science through Scratch. Designed individual learning paths and applied flexible teaching methods.

- **18.11.2022 - now:**

Working on own projects

Designed and developed diverse software projects ranging from desktop applications to games and automation scripts. Created "Reclawler," a cross-platform Python game featuring a fully automated CI/CD pipeline built with GitHub Actions. Actively collaborated in team-based hackathons, notably competing twice at the BitFestival creating games in Unity (C#). Additionally, built a full-stack Warehouse Management System with small team and engineered a multithreaded Color Blindness Simulator featuring Assembly-level optimizations. Expanded expertise into machine learning by developing an AI-driven controller for my own game. All project source codes and configurations are maintained and publicly available on my GitHub profile.

EDUCATION

- **2026 – now (M.Eng.):**

University of Silesia in Katowice, Faculty: Science and Technology, Program: Computer Science.

- **2022 – 2026 (B.Eng.):**

Silesian University of Technology, Faculty: Automation, Electronics, and Computer Science, Program: Computer Science.

LANGUAGES

- English: Upper-Intermediate Level (B2)
- Polish: Native

SKILLS

Python, Linux, Git (CI/CD), AI & Machine Learning, C#, C++, SQL, Web Development, Automation (n8n, Zapier), Docker and many more.

COURSES COMPLETED

- **Unit Testing in Python using Unittest Framework.....(26.12.2024)**
- **Pygame Tutorial – Create a Dungeon Crawler.....(26.12.2023)**
- **ENGLISH COURSE AT UPPER-INTERMEDIATE LEVEL B1+.....(01.06.2021)**
